Interpreting Gandhi discusses the seminal role of Mahatma Gandhi in Indian Independence and also examines his identity as a social reformer, an educationist, philosopher and economist. Despite his paramount contribution to the development of a secular, democratic nation state, his views sometimes differed from those of other dignitaries like Rabindranath Tagore, Subhas Chandra Bose and Babasaheb Ambedkar. The nation's current sociopolitical and cultural milieu have undergone much anticipated and contested changes in various sectors since independence. After the advent of "globalization", some pivotal questions have been raised regarding the relevance of Gandhi's visions, considering the ever-dynamic nature of the post-independence context. This volume is based on the research articles, and we intend to find out the answer to the above question with the help of these articles. Through these articles we attempted to reinterpret Gandhi in this book in distinctive ways. Academicians, researchers and students would be benefitted by learning about Gandhi's identity in a different dimension.
